

I-DRAIN® SQUARE 15x15

> No welded joints, available in 3 versions

The Square Drain is a 15x15 cm large - or rather small - drainage well that is highly suitable for a shower without sill and for other personal and industrial use such as kitchen, garage, depository,...

The extremely low built-in height of 54 mm makes this drain suitable for any new build or renovation work. The Square Drain is made entirely of deep drawn stainless steel so there are no welded joints.

DDS (Double Drain System)

Built-in height from 54 mm

DN 40 - water seal 35

Capacity - 26.4 l/min.

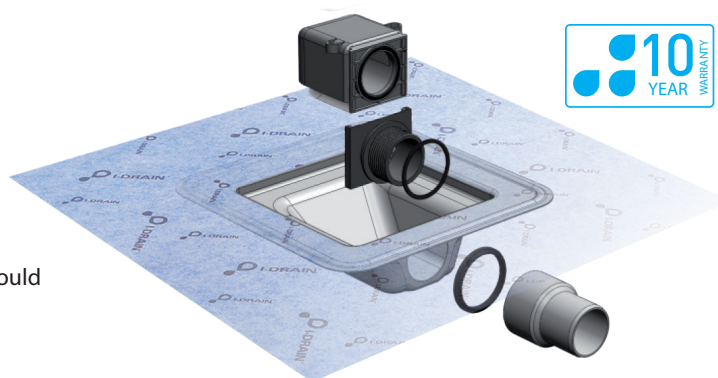

Use with any tile finish - 3 mm to 30 mm

Tested - 25 years of durability!

Compatible with liquid waterproofing

Removable and dismantable siphon

Included: I-Buddy (installation mould) and tile mould
